Course and Contact Information

Instructor: Thesis Committee Chair.

Your EE299A thesis committees will also be your EE299B committees. In special circumstance that you must change any member of your thesis committee, approvals from current Thesis Committee Chair and Graduate Advisor are required.

Your EE299A Thesis Committee Chair can deny to serve as your EE299B Thesis Committee Chair based on your performance. In this special circumstance, you need to discuss with Graduate Advisor to resolve the issue.

Class Days/Time:
- Meet the Graduate Advisor on the second Friday of the semester as shown on the "Tentative Course Schedule" on the last page of the syllabus. Other meetings will be announced via emails by Graduate advisor. All meetings with Graduate Advisor will be on Fridays from 11:00 to 11:30 in E345
- Have regular meetings with thesis committee chair throughout the semester as scheduled by the thesis committee chair
- Will receive several emails from Graduate Advisor. Make sure to follow the instructions and required submissions stated in the syllabus, in the emails, and in meetings with Graduate Advisor.

Strict rules will be applied to the courses.

Prerequisites: Classified with overall GPA and major GPA of 3.0 or above. Satisfaction of GWAR or completion of EE295 or EE295 to be taken concurrently. Having plan to graduate in 2 semesters (EE299A & EE299B should be taken in the last two semesters)

Team Only one (1) student per thesis. Group work is NOT allowed for thesis.

Enrollment Enroll into EE299A by filling out EE299A Application form and submit the form to EE office for addcode. The EE299A application forms are available at link below:

http://ee.sjsu.edu/files/public/downloadable_forms/EE299AForm.pdf

Grading Scheme CR/NC (Credit/Non-credit)

Course Description

EE299A is the first part of a 2-course sequence for a MSEE thesis. Students complete EE299A by completing their master thesis proposals (with detailed plans for their thesis work) and the initial phase of the thesis. Students work directly with their thesis committee chair for the proposals and should start to carry-out the proposed work as early as possible.
Note: The proposal format and contents are defined by your thesis committee chair, but the proposal must have proposal cover page downloaded from class canvas, or it will be rejected. The master thesis proposal guidelines and cover pages are both available on the class canvas.

Course Learning Outcomes
Upon successful completion of this course, students will be able to:

- Understand and practice critical thinking
- Understand requirements and translate them to a specification
- Understand capabilities and limitations of engineering methods and tools
- Demonstrate an ability to use industry acceptable methods to specify, plan, design, debug, and demonstrate a project concept.
- Use critical thinking to add something to the art of engineering.
- Prepare readable well organized documentation describing what is to be done, how it is to be done, why an approach is recommended, and instruct, inform, and enlighten other engineers.

Critical thinking has been described as:

A person who thinks critically can ask appropriate questions, gather relevant information, efficiently and creatively sort through this information, reason logically from this information, and come to reliable and trustworthy conclusions about the world that enable one to live and act successfully in it. ... critical thinking mimics the well-known method of scientific investigation: a question is identified, an hypothesis formulated, relevant data sought and gathered, the hypothesis is logically tested and evaluated.

Students who can think critically can:

- Determine what information is required to achieve an objective, find that information, and apply it
- Create designs from limited information
- Design tests that can prove that a design meet a specification
- Identify design errors, and adjust a design to meet specifications
- Ask meaningful questions after exhausting available resources when seeking help.

A course goal is students learn to enjoy a master thesis through a hand-on approach.

Student Preparedness

Students are expected to have previously taken courses in the thesis area of interest. They should have contacted a faculty advisor, and be working towards thesis acceptance.

Textbook

There is no text book for EE299A.

Course Requirements and Assignments

- Meet with project advisor as required and/or scheduled by the project advisor
- Perform research and report to project advisor as required by the project advisor
- Complete and submit (on canvas and hard-copy) on time (see the schedule on the last page) a project proposal approved by project advisor and graduate advisor
Implement an initial phase of the project and is evaluated as satisfaction by project advisor

**Grading Information - Outcome Assessment**

The grading for EE299A is CR/NC/RP (Credit/No-Credit/Report Pending). To achieve credit in the class, a student must
- Complete and submit (on canvas and hard-copy) on time (see the schedule on the last page) a project proposal approved by his/her project advisor and graduate advisor.
- Be evaluated as satisfaction by his/her project advisor based on his/her performance in implementing the initial phase of the project work

**Time commitment**
- Students are expected to spend about 1 hours/week in meetings with advisers, invest about 40 hours total in proposal writing, and dedicate about 120 hours to initial thesis work during the semester.
- In addition, policy S12-3 makes the following statement: “Success in this course is based on the expectation that students will spend, for each unit of credit, a minimum of forty-five hours over the length of the course (normally 3 hours per unit per week with 1 of the hours used for lecture) for instruction or preparation/studying or course related activities including but not limited to internships, labs, clinical practical. Other course structures will have equivalent workload expectations as described in the syllabus.”
- EE299A will exceed this minimum requirement.

**Classroom Protocol**

N/A

**University Policies**

Office of Graduate and Undergraduate Programs maintains university-wide policy information relevant to all courses, such as academic integrity, accommodations, etc.” You may find all syllabus related University Policies and resources information listed on GUP’s Syllabus Information web page at http://www.sjsu.edu/gup/syllabusinfo/

**EE Honor Code - Honesty and Respect for Others and Public Property**

The Electrical Engineering Department will enforce the following Honor Code that must be read and accepted by all students.
“\[\text{I have read the Honor Code and agree with its provisions. My continued enrollment in this course constitutes full acceptance of this code. I will NOT:}\]
- Take an exam in place of someone else, or have someone take an exam in my place
- Give information or receive information from another person during an exam
- Copy thesis information from others
- Use more reference material during an exam than is allowed by the instructor
- Obtain a copy of an exam prior to the time it is given
- Alter an exam after it has been graded and then return it to the instructor for re-grading
- Leave the exam room without returning the exam to the instructor.”
Measures Dealing with Occurrences of Cheating

- Department policy mandates that the student or students involved in cheating will receive an “F” on that evaluation instrument (paper, exam, project, homework, etc.) and will be reported to the Department and the University.
- A student’s second offense in any course will result in a Department recommendation of suspension from the University.

Tentative Course Schedule

*Dates can be changed with notices by emails from Graduate Advisor*

<table>
<thead>
<tr>
<th>Week #</th>
<th>Topic</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Meet your thesis committee chair to develop an abstract for EE299A application form (thesis committee chair's signature is required on EE299A application form)</td>
</tr>
<tr>
<td>2</td>
<td>Meeting with Graduate Advisor regarding class syllabus, policies, deliverables, due dates, etc… <strong>Friday February 03, 11:00 – 11:30, room E345</strong></td>
</tr>
<tr>
<td>3</td>
<td><strong>Friday February 10 (before 12:00 PM)</strong>: Last day to submit EE299A application form to EE office for EE299A addcode</td>
</tr>
<tr>
<td>4</td>
<td><strong>Tuesday February 14</strong>: Last day to add courses</td>
</tr>
<tr>
<td>4 – 8</td>
<td>Meetings with your thesis committee chair to develop a comprehensive proposal for your MSEE thesis</td>
</tr>
</tbody>
</table>
| 8      | **Friday March 17 (before noon)**: Last day to  
  - Submit softcopy of your final thesis proposal on CANVAS  
  - Submit hard-copy of your final thesis proposal to Graduate Advisor by dropping off the proposal in EE office  
  **Note:**  
  - Thesis Committee Chair's signature is required on the hard-copy of the proposal. No need to have signature on the soft-copy  
  - No need to have Graduate Advisor's signature on the submitted proposal  
  - The proposal must have the thesis proposal cover page downloaded from canvas or it will be rejected |
| 9 - 16 | Continue to work on the thesis (evaluation from thesis committee chair is required for EE299A grading) |
